

The Honorable Jay Dickey
U.S. House of Representatives
Washington, D.C. 20515

I am in the military, and derive many hours of enjoyment from building and operating radio controlled model airplanes; I have been interested in aviation as long as I can remember. I am very active in a local club whose members enjoy constructing and operating radio controlled model aircraft. I also fly my model aircraft in competition, and sometimes drive to another state to do so. I have even flown my model airplanes in other countries while stationed there.

I am very concerned about proposed rules that are currently under consideration by the Federal Communications Commission (FCC). The proceeding is PR Docket 92-235. If adopted, the new rules will greatly reduce the usability of frequencies currently assigned for model use and increase the risk of accidents and attendant liability for controlling model airplanes.

Our radio control frequencies are in the 72 - 76 MHz band. This band is primarily used for private land mobile dispatch operation. However, our radio control frequencies in this band are far enough apart from the land mobile frequencies that we have been able to share the band without either use interfering with the other.

February 17, 1993

Honorable Jay Dickey
U.S. House of Representatives
Washington, DC 20515

Dear Mr. Dickey,

I would like to express my opposition to
to proposed FCC Action NPRM Docket 92-235.

I am a builder and flier of radio controlled model airplanes.
Since I am retired, I derive many hours of pleasure from this
hobby. Also, I have invested several thousand dollars in airplanes,
radios and related equipment. If the FCC adopts this proposal,
I feel it will jeopardize my hobby.

Sincerely,

J.R. Ueckert
